

AAMIR SOHAIL

Lead Software Engineer - Salesforce | SFCC | Apex | LWC

Jaipur, Rajasthan, India | eraamirsohail@proton.me | linkedin.com/in/aamirsohailas | github.com/aamirsohail6377

PROFESSIONAL SUMMARY

Salesforce Certified Developer with 5+ years of hands-on experience in Salesforce B2C Commerce (SFCC), Apex, Lightning Web Components (LWC), Salesforce Sales Cloud, Salesforce Service Cloud, and Salesforce Administration. Proven expertise across the full Salesforce ecosystem, including custom Lightning applications, Apex triggers, test classes, asynchronous Apex, Screen Flows, Auto-Launched Flows, Record-Triggered Flows, validation rules, Process Builder, workflows, and approval processes. Specialized in end-to-end e-commerce implementations, SFRA architecture, SiteGenesis-to-SFRA migrations, and storefront customization using ISML, JavaScript, HTML, CSS, and Node.js. Skilled in Agentforce Agent, Prompt Builder, deployment automation (AutoRabit, Copado, GitHub, Bitbucket), and Salesforce Data Cloud. Holds 7 active Salesforce certifications. Strong track record delivering scalable, high-performance solutions for global clients across e-commerce, manufacturing, and pharmacy/healthcare domains in the USA, Israel, and UK.

Programming Languages: JavaScript (ES6+), Apex, Node.js, HTML5, CSS3, SCSS, HBS (Handlebars), SOQL, SOSL

Cloud & DevOps: AWS (Amazon Web Services), JSForce, REST APIs, Git, GitHub, Bitbucket, Visual Studio Code, JIRA, CI/CD, Deployment Automation

Deployment & Release Tools: AutoRabit, Copado, GitHub, Bitbucket, Visual Studio Code

Methodologies: Agile, Scrum, Test-Driven Development (TDD), Object-Oriented Programming (OOP)

Integrations & Tools: Google Analytics 4 (GA4), Adyen, JSForce, SAP Integration, HBS (Handlebars), Salesforce Advanced Approvals, Loyalty Programs, Chatbot Integration, Data Loader

Domains: E-commerce, Manufacturing Industries, Pharmacy / Healthcare Industry

CERTIFICATIONS

- Salesforce Certified Administrator
- Salesforce Certified B2C Commerce Developer
- Salesforce Certified Platform Developer I
- Salesforce Certified JavaScript Developer I
- Salesforce Certified Data Cloud Consultant
- Salesforce Certified AI Associate
- Google Generative AI Leader

WORK EXPERIENCE

Lead Software Engineer

Persistent Systems | Jaipur, India | March 2025 - Present

Project: Healthcare/Pharmacy - Salesforce Service Cloud (Pharmacy)

Duration: July 2025 - August 2026 | Domain: Salesforce Sales Cloud, Salesforce Service Cloud (Pharmacy)

- Led the analysis effort to migrate data to a new Salesforce Org as part of the client's org consolidation initiative.
- Analyzed existing classes, components, flows, and other org elements to plan the migration approach.
- Migrated legacy Process Builders into Flows, modernizing automation and improving maintainability.

- Built a five-step ordering site for the UK region, enabling customers to place orders for required medicines.
- Cloned and developed new Aura components to extend platform functionality.
- Created trigger helpers and Flows to automate SMS and email notifications.

Software Tools/Skills: Salesforce Sales Cloud, Salesforce Service Cloud, Salesforce Advanced Approval, Apex, LWC Components, Aura Components.

Project: Australian Car Website - E-Commerce Platform

Duration: March 2025 - Present | Domain: E-commerce (SFCC, Salesforce Sales Cloud, Salesforce Service Cloud, SAP, Node.js, AWS)

- Designed and developed Page Designer components for the homepage, enabling merchant-configurable storefronts without developer intervention.
- Implemented Google Analytics 4 (GA4) for full-funnel e-commerce tracking and marketing visibility.
- Built Product Detail Page (PDP) configurations supporting all vehicle model variants, accessories, and dynamic pricing.
- Developed a secure Forms framework with centralized error handling and input validation to protect customer data.
- Created multiple ISML templates as reusable, modular storefront components, improving code reusability and delivery speed.
- Managed product catalog configurations and product list builds across the SFCC platform, integrating with SAP and AWS.

Software Tools/Skills: Salesforce Sales Cloud, Salesforce Service Cloud, Salesforce Advanced Approval, Apex, LWC Components.

Senior Salesforce Developer

Astrea IT Services | Jaipur, India | February 2025

- Delivered Salesforce platform configuration, customization, and targeted Apex/LWC solutions to meet client-specific CRM requirements.

Software Developer (Promoted from Associate Software Developer)

Cyntexa Labs Pvt Ltd | Jaipur, India | December 2021 - January 2025

Project: Streamlined Salesforce Deployment System - Israel-Based Clients (SaaS)

Duration: June 2024 - December 2024 | Role: Software Developer | Domain: SaaS-based Products

- Developed a centralized Salesforce deployment system giving clients faster access to the latest Salesforce features.
- Built a suite of custom tools to automate repetitive tasks, including data migration and configuration change management.
- Implemented a middleware solution using JSForce, AWS cloud services, and Node.js for centralized deployment management.
- Leveraged Node.js for scalability and efficiency in handling deployments across multiple client orgs.
- Integrated Lightning Web Components (LWC) to improve the user interface and streamline deployment management within Salesforce.
- Implemented backup and automated rollback functionality, ensuring zero data loss and rapid recovery from failed deployments.

Software Tools/Skills: Salesforce Sales Cloud, Salesforce Service Cloud, Salesforce Advanced Approval, Apex, LWC Components.

Project: Teddy Bear Manufacturer Company - SFRA Migration (USA)

Duration: February 2024 - October 2024 | Role: Software Developer | Domain: E-Commerce Site

- Led a full SiteGenesis-to-SFRA (Storefront Reference Architecture) migration, modernizing the e-commerce storefront for improved performance and scalability.
- Developed Page Designer components for the homepage, enabling merchant self-service configuration.
- Built PLP (Product Listing Page), PDP (Product Detail Page), and CLP (Content Landing Page) components.
- Implemented gift product functionality and a Loyalty Program using Salesforce Core Cloud, enhancing customer retention.
- Integrated Adyen payment gateway and Adyen Giving donation functionality, expanding checkout capabilities.
- Created scheduled SFCC jobs to synchronize data with third-party systems and implemented Google Analytics 4 (GA4) tracking.

Software Tools/Skills: Salesforce B2C Commerce, Salesforce Admin, Sales Cloud, JIRA, Bitbucket.

Project: Single Page Checkout - SFCC Multi-Brand (USA)

Duration: June 2023 - December 2023 | Role: Associate Software Developer | Domain: E-Commerce Site

- Designed and built a single-page checkout (SPC) experience for multiple SFCC storefronts across hair care and men's grooming brands, improving conversion rates and user engagement.
- Modified PLP and PDP ISML templates to deliver a consistent, seamless UI across multiple brands within the same SFCC instance.
- Built pages enabling users to purchase products, adjust quantities, and complete payment on a single screen directly from ad and campaign redirects, increasing sales revenue.

Software Tools/Skills: B2C Commerce Cloud, JIRA, Bitbucket.

Project: Online Jewelry Store - SFCC Migration

Duration: November 2022 - May 2023 | Role: Associate Software Developer | Domain: E-Commerce Site

- Migrated an existing jewelry e-commerce platform to Salesforce B2C Commerce Cloud (SFCC), improving platform performance, scalability, and maintainability.
- Built custom dropdown components with search and highlight features, and integrated a Bootstrap Calendar for date fields.
- Integrated a price range slider for PLP filtering and developed custom Page Designer homepage components for merchant self-service.
- Implemented Chatbot functionality and integrated with OMS (Order Management System) for order handling.
- Implemented Wishlist functionality using the Salesforce Product List API and a back-in-stock 'Notify Me' email feature, improving customer experience and repeat purchase intent.

Software Tools/Skills: B2C Commerce Cloud, Sales Cloud, Apex, Data Loader, Lightning Web Components.

Project: Beauty Products - L'Oreal Production Support (NGL)

Duration: March 2022 - October 2022 | Role: Associate Software Developer | Domain: E-Commerce Site

- Provided production support and bug resolution for L'Oreal's multi-site Salesforce B2C Commerce Cloud (SFCC) architecture, in collaboration with the L'Oreal engineering team.
- Resolved high-severity production issues within SLA deadlines, minimizing revenue impact and downtime for a global brand.
- Implemented gift product functionality and built a Wishlist feature using the Salesforce Product List API for future customer reference.
- Developed custom HBS (Handlebars) storefront components to enhance site functionality.

Software Tools/Skills: Salesforce B2C Commerce Cloud.

ACHIEVEMENTS

- Received client appreciation for outstanding work, including a celebration event hosted by the client upon successful project completion.

EDUCATION

Bachelor of Technology (B.Tech) - Computer Science and Engineering

Anand International College of Engineering | Jaipur, Rajasthan | 2018 - 2022
